Business Support

The company is the beneficiary in the Gauteng Enterprise Propeller's SMME Support. We received the most essential equipment and material through the Community Fund and Business Development Support Programmes. We are already utilizing them to our advantage by undertaking multiple projects and employing more people. We also acquired critical business management skills in Basic Sales and Marketing and bookkeeping and Accounting. The skills are going to help us to deliver an excellent service to our clients and further grow our company.

We are proud to be supported by GEP.

- Tree Felling

Our projects:

Active:

- Tenders for the Working for Water Programme – (Department of Environmental Affairs).

Previous:

- We completed a number of garden development projects in the community and doing ongoing maintenance.

The Environmental challenge we all face:

The business addressed the urgent challenge to manage alien plants and related water consumption and blocking of rivers.

- Invasive alien species are plants, animals and microbes that are introduced into countries, and then out-compete the indigenous species.

- Invasive alien plants (IAPs) pose a direct threat not only to South Africa's biological diversity, but also to water security, the ecological functioning of natural systems and the productive use of land. They intensify the impact of fires and floods and increase soil erosion. IAPs can divert enormous amounts of water from more productive uses and invasive aquatic plants, such as the water hyacinth, effect agriculture, fisheries, transport, recreation and water supply.
- Of the estimated 9000 plants introduced to this country, 198 are currently classified as being invasive. It is estimated that these plants cover about 10% of the country and the problem is growing at an exponential rate.
- The fight against invasive alien plants is spearheaded by the Working for Water (WfW) programme, launched in 1995 and administered through the Department of Water Affairs and Forestry. This programme works in partnership with local communities, to whom it provides jobs, and also with Government departments including the Departments of Environmental Affairs and Tourism, Agriculture, and Trade and Industry, provincial departments of agriculture, conservation and environment, research foundations and private companies.
