

About Us

Company Registration: **2005/145604/23**

Nolenga Transport is a 100% black community based transport company. It was established on the 2005 by an enthusiastic Mr Andries Skosana. The company is committed to contributing to the development of areas around its place of operations in Bronkhorstspruit through social upliftment and environmental awareness programmes workshops which it runs from time to time.

We offer sustainable environmental management solutions specializing in the Terrestrial sector. Our invasive alien plant control methods comply with the health and environmental regulations.

The company has developed a reputation for our first class

transport service and reliability in the industry. Nolenga Transport is recognised mostly in the Tshwane region where it has also successfully completed alien plant control and gardening projects. We take pride in providing a well-researched and compliant sustainable solution for all the transport, environmental and garden challenges.

At Nolenga Transport, when we work on environmental projects, we only use methods and chemicals that are approved by the environmental inspectorate and comply with all the regulations and municipal by-laws. Our competent and dedicated team undergoes intensive health and safety induction training before a project is undertaken. We always ensure that your property and every belonging are safe during our presence.

Nolenga Transport increased its capacity with the equipment funded by the Gauteng Enterprise Propeller through the Community Fund programme. With the support we get from the agency, our marketing approach is better after receiving the much needed marketing tools and the basic Sales and Marketing and Bookkeeping and Accounting Skills training. She is coupling the skills with her vast experience in the field and also has completed the First Aid and Herbicide Applicator courses. The skills will help the company to deliver and realize its objectives and vision effectively and efficiently.

The company's expertise has been recognized widely and it has won the consecutive contracts in the working for water programme, contributing towards social upliftment and sustainable conservation.

Business Support

The company is the beneficiary in the Gauteng Enterprise Propeller's SMME Support. We received the most essential equipment and material through the Community Fund and Business Development Support Programmes. We are already utilizing them to our advantage by undertaking multiple projects and employing more people. We also acquired critical business management skills in Basic Sales and Marketing and bookkeeping and Accounting. The skills are going to help us to deliver an excellent service to our clients and further grow our company.

We are proud to be supported by GEP.

Supported by:

Nolenga Transport in the field:

Our MOTTO

“Be a friend to the environment”

Vision

To create an environment rich in all things flora and fauna throughout our hand

Mission

Care for the environment on a frequent basis

- Gardening and related services
- Tree Felling

Our projects:

Active:

- Tenders for the Working for Water Programme – (Department of Environmental Affairs).

Previous:

- We completed a number of garden development projects in the community and doing ongoing maintenance.

The Environmental challenge we all face:

The business addressed the urgent challenge to manage alien plants and related water consumption and blocking of rivers.

- Invasive alien species are plants, animals and microbes that are introduced into countries, and then out-compete the indigenous species.
- Invasive alien plants (IAPs) pose a direct threat not only to South Africa's biological diversity, but also to water security, the ecological functioning of natural systems and the productive use of land. They intensify the impact of fires and floods and increase soil erosion. IAPs can divert enormous amounts of water from more productive uses and invasive aquatic plants, such as the water hyacinth, effect agriculture, fisheries, transport, recreation and water supply.
- Of the estimated 9000 plants introduced to this country, 198 are currently classified as being invasive. It is estimated that these plants cover about 10% of the country and the problem is growing at an exponential rate.
- The fight against invasive alien plants is spearheaded by the Working for Water (WfW) programme, launched in 1995 and administered through the Department of Water Affairs and Forestry. This programme works in partnership with local communities, to whom it provides jobs, and also with Government departments including the Departments of Environmental Affairs and Tourism, Agriculture, and Trade and Industry, provincial departments of agriculture, conservation and environment, research foundations and private companies.
